Mohit Singh Negi

Data Engineer | Python, Spark, PostgreSQL | ex-Technology Analyst | Java, Spring Boot
mohitnegi165@gmail.com | +353 89 251 8239 | Dublin | linkedin.com/in/moh1tnegi/ | github.com/moh1tnegi

Summary

IBM Data Engineering Professional | **5 years** of industry experience in **Python**, **PostgreSQL & Backend APIs** | Skilled in **Data Pipelines, Data Migration, SQL Optimization, and Scalable Systems** | Multiple Infosys Awards Winner

Skills

Programming & Development
Python, SQL, Pandas, Numpy, Spark, AWS Glu, Lambda, Step Functions, EC2, Kafka, Airflow, Django, FastAPI, Java, Spring Boot, REST APIs, Linux, Microservices, Multithreading

Database, DevOps & Testing
Redshift, DynamoDB, PostgreSQL, Cassandra, MongoDB, JUnit, SonarQube, pytest, JMeter, Splunk, Docker, CI/CD, Putty

AI/ML, Collaboration & Versioning
AWS Bedrock, Generative AI, Feature Engineering, Prompt Engineering, Swagger, Confluence, Jira, Git, Agile Methodology

Experience

InclinedPlane — Bengaluru
Data Engineer — July 2025-July 2026

- **Architected generative AI solutions** using AWS Bedrock to automatically classify and generate contextual responses for incoming customer queries via official email channels.
- **Developed a real-time competitive pricing engine** leveraging AWS Bedrock for advanced product classification, enabling automated price adjustments on Amazon based on competitor data.
- **Engineered scalable data ingestion pipelines** and scheduled workflows using a comprehensive AWS stack (Glue, Lambda, S3, EC2, Step Functions, Redshift, DynamoDB) to power daily sales dashboards.
- **Automated critical vendor operations** and Jira ticket workflows by developing robust Python and Selenium scripts, significantly reducing manual processing overhead.

Infosys — Chandigarh
Technology Analyst — Sep 2021 - Feb 2025

- Implemented **AES-256 encryption** for securing customer data and developed robust secure **REST APIs** with J**ava Spring Boot** to enhance data protection, achieving **85%** reliability.
- Achieved **97% JIRA** story deliveries using **Agile** methodology with comprehensive demos, customer satisfaction, and concise communication between team and client while proactively adhering to **SDLC**.
- Migrated complex **Elasticsearch APIs** to **Spring Boot JPAs** with **performance optimizations** to achieve **80% faster millisecond response times**.
- Created **CI/CD** pipelines and troubleshot various **microservices**, deployed them in different environments, and streamlined the services using the client's **Conducktor** platform in collaboration with DevOps.
- Engineered a **Python script and PLSQL procedure** to seamlessly migrate **20M+ Cassandra records** into **PostgreSQL**, optimizing data transformation processes.
- Accelerated database migration up to **80x** using **Python's mogrify** technique, enhancing **keys** and **index** performance in collaboration with the **lead architect** for a seamless production rollout.
- Led **Spring Boot and Java version upgrades**, modernizing the tech stack by **refactoring beans**, replacing deprecated implementations like **RestTemplate 'WebClient**, and **automating Splunk alerts** for real-time monitoring of production issues.
- Achieved **exceptional** rating and feedback from the client in 2023 for innovative problem-solving ideas in **data migration using Python** and **top performer** rating for **two consecutive** years at Infosys under the senior project manager.
- Contributed to multiple **critical production releases**, ensuring **98%+ success rates** in high-stakes deployments.
- **Developed precise API documentation** and **JSON** payload using **Postman and Swagger**, ensuring seamless integration and validation of microservices across multiple teams.
- Hands-on experience with **AWS EC2** for **Linux**-based executions of **Python** and **Scala** scripts.
- **Streamlined Dev, QA, and Perf environment configurations** reducing redundancy and **cutting manual setup time by 40%** for improved development efficiency.

- **Enhanced Spring Boot API performance** by **70%** by generating and analyzing performance environment reports on **JMeter** with the QA team.
- Published extensive **Confluence** documents, detailing database interrelations, data flow, script executions, and release cargo (e.g. MRs and pipelines) with other teams.
- **Automated large-scale data correction tasks 60x faster using Python** by processing massive Excel files in chunks and automating the generation of **insert/update** queries for database maintenance.
- Utilized **Git** for streamlined version control, facilitating efficient team collaboration, source code management, and seamless release processes.
- Maintained high code quality by ensuring **JUnit tests** and **SonarQube coverage** exceeded **82%** for all microservices while addressing key metrics such as **code redundancy, readability, maintainability, security vulnerabilities, and overall efficiency**.

Kofluence Remote - Bangalore
Software Engineer Aug 2021 - Sep 2021

- Led the migration of APIs from **Django** to **FastAPI**, achieving a **3x** performance boost and implementing **SQLAlchemy** for optimized and flexible database interactions and **Redis** caching..
- Designed and integrated **Swagger documentation** with auto-generated **cURL commands** for seamless Postman usage.
- Ensured **80%+ code coverage** with **pytest**, eliminating redundant code and enhancing maintainability.

Awards

RISE Awards - Rookie of the Unit March 2023
Infosys

Insta Award x4 Sep 2022, Feb 2023, March 2023, Dec 2024
Infosys

1st Place in Data Structures & Algorithms Competition during Post Graduation. Sep 2019
Uttaranchal University

Winner of the University-Wide Computer Science & Fundamentals Competition. Mar 2017
IHMS Kotdwar

Certifications

IBM Data Engineering Professional June 2025
IBM
https://www.coursera.org/account/accomplishments/specialization/IGGS5Y9U2DHZ

Infosys Certified Java SE8 Developer Feb 2022
Infosys

Infosys Certified Spring Professional Feb 2022
Infosys

Education

National College of Ireland Dublin • 2026-Present
MSc in Artificial Intelligence

Uttaranchal University Aug 2019 - Jun 2021
Master of Computer Applications

HNBGU Srinagar Aug 2016 - Mar 2019
Bachelor of Computer Applications

RCD Public School April 2013 - Mar 2015
Senior High School (12th)

Rising Sun Public School Mar 2013
High School (10th)

Publications

1. JavaScript Events
2. Clear screen in python
3. Dunder or magic methods in Python
4. Testing in Python using Doctest module
5. Implementing web scraping using lxml in Python
6. Python | Working with .docx module
