Summary

- MSc Artificial Intelligence student at National College of Ireland with over 5 years' experience in data engineering and backend development, seeking an AI/ML Engineer role.
- Built generative AI applications on AWS Bedrock at Cocoblu Retail for customer email classification and an automated pricing engine.
- Designed AWS data pipelines (Glue, Lambda, Step Functions, Redshift) for daily sales dashboards, and migrated over 20 million Cassandra records to PostgreSQL at Infosys.
- Stamp 2: part-time now, full-time (40 hours/week) from July 2027; eligible for Stamp 1G from September 2027.

Education

MSc in Artificial Intelligence - National College of Ireland, Dublin, Ireland — Sep 2026 - Present

Master of Computer Applications - First-Class Honours - Uttaranchal University, Dehradun, India — Aug 2019 - Jun 2021

Bachelor of Computer Applications - First-Class Honours - HNBGU Srinagar, India — Aug 2016 - Mar 2019

Skills

AI/ML: AWS Bedrock, Generative AI, Feature Engineering, Pandas, NumPy, Claude Code

Languages & Frameworks: Python, SQL, Java, Spring Boot, FastAPI, Django, REST APIs, Microservices, Multithreading

Data & Cloud: AWS (Glu, Lambda, Step Functions, EC2, S3, Redshift, DynamoDB), Spark, Kafka, Airflow, PostgreSQL, Cassandra, MongoDB

DevOps, Testing & Tools: Docker, CI/CD, Git, Linux, Splunk, JUnit, pytest, JMeter, SonarQube, Swagger, Jira, Confluence, Agile

Certifications

IBM Data Engineering Professional — Jun 2025
https://www.coursera.org/account/accomplishments/specialization/IGGS5Y9U2DHZ

Infosys Certified Java SE8 Developer — Feb 2022

Infosys Certified Spring Professional — Feb 2022

Experience

Data Engineer | Cocoblu Retail Ltd. | Bengaluru, India | Jul 2025 - Jul 2026

Data team of 8 supporting pricing, sales reporting, and vendor operations for a multi-category e-commerce seller on Amazon India (RattanIndia Enterprises).

- Built an AWS Bedrock application that classified incoming customer emails into 12 categories and sent automatic replies or generated draft replies reviewed by a human in the loop, handling about 80 emails per day.
- Developed a pricing engine using AWS Bedrock to match over 1,000 products per day against competitor listings, updating Amazon prices every hour based on profit margin.
- Designed over 20 AWS data pipelines (Glu, Lambda, Step Functions, S3, Redshift, DynamoDB) ingesting over 100 GB daily from data files for sales dashboards used by internal teams and business stakeholders.
- Automated 13 web workflows with Python and Selenium, including cost uploads, purchase orders, deals and discounts, internal data file uploads, and Jira ticket resolution, saving around 200 hours of manual work per week.
- Maintained 100 TB of core Redshift databases, complex scheduled procedures, queries, existing sales dashboards, data pipelines, and web automations.

Technology Analyst | Infosys Ltd. | Chandigarh, India | Sep 2021 - Feb 2025

Backend team of 14 at a global IT services firm, building Spring Boot microservices and data migrations for client T-Mobile US.

- Rated top performer for two consecutive years at Infosys; received an exceptional T-Mobile client rating (2023) for data-migration problem-solving.

- Migrated 20 million Cassandra records to PostgreSQL using Python and SQL procedures on AWS EC2, cutting transformation time from 4 hours to 30 minutes by batching inserts with psycopg2 mogrify() method.
- Automated bulk data corrections by processing heavy Excel files in chunks with Python to generate SQL updates, cutting weekly update time from 7 hours to 2 hours.
- Rebuilt Elasticsearch APIs as Spring Boot JPA REST services, with average response times of 500 ms.
- Reduced latency of 6 APIs from 1,500 ms to 500 ms on average by analysing JMeter load tests with QA and fixing time-consuming queries.
- Led Java and Spring Boot upgrades across 8 microservices and automated Splunk alerts for real-time production monitoring.
- Maintained JUnit/SonarQube coverage above 82% across microservices, and built CI/CD pipelines with DevOps for 13 production releases with no rollbacks.

Software Engineer | Kofluence | Bengaluru, India | Aug 2021 - Sep 2021
Backend team of 4 at an influencer marketing agency, migrating a Django system to FastAPI.
- Migrated 4 APIs from Django to FastAPI with SQLAlchemy and Redis caching, reducing average response time from 2,000 ms to 700 ms.
- Created Swagger documentation for 4 APIs with auto-generated cURL commands for Postman testing.
- Raised pytest coverage from 23% to 84% on the migrated services, removing redundant code.

Awards

Insta Award x4 - Infosys, India — Sep 2022, Feb 2023, Mar 2023, Dec 2024

RISE Awards - Rookie of the Unit - Infosys, India — Mar 2023

1st Place in Data Structures & Algorithms Competition during Post Graduation - Uttaranchal University, India — Sep 2019

Winner of the University-Wide Computer Science & Fundamentals Competition - IHMS Kotdwar, India — Mar 2017
